Mhd Saria Allahham

13433336614 | sarea.laham@gmail.com | LinkedIn | Google Scholar | Montreal, QC

Summary

As an AI/ML engineer and researcher, I bring over four years of experience in AI research, specifically within the Telecommunications field. My expertise lies in implementing and developing cutting-edge AI/ML algorithms tailored for Telecommunications applications. My portfolio showcases a solid track record in both academic research and industry projects, highlighting my ability to practically integrate theoretical AI/ML concepts and convert them into deployable solutions.

Education

Queen's University Kingston, ON, Canada
M.Sc. in Computer Science; ***GPA: 4.30/4.30*** *Jan 2021 – Apr 2022*

Thesis: Multi-Orchestrator Mobile Edge Learning: Designing Energy-Efficient Task Allocation and Incentive Schemes

Qatar University Doha, Qatar
B.Sc. in Computer Engineering ***GPA: 3.90/4.00*** *Jan 2016 – Apr 2020*
Graduated with High Order of Excellence

Senior Project: Designing a Smart Home Controller for Smart Home Devices using Hand Gestures

Projects

5G Mobile Wireless Networks Simulator with AI-based Load Balancing Algorithms
Samsung Research America

- **Summary:** A proprietary practical simulation software designed to simulate 5G Networks and AI load balancing algorithms.
- **Programming Languages:** Java, Python, MATLAB
- **Relevant Software & Libraries:** PyTorch, CVX/CVXPY, Stable Baselines3
- **Open-source version:** https://github.com/saria-lh/MERLIN

AI-based Indoor Localization and Human State Estimation using Ultra-Wideband Protocol
Samsung Research America

- **Summary:** A proprietary framework that enables the estimation of location, activities, and the number of people in an indoor environment without requiring them to carry specific devices.
- **Programming Languages:** C/C++, Python, Java
- **Relevant Software & Libraries:** PyTorch, OpenCV, ROS, Docker

Job Experience

Samsung Research America, AI Center Montreal, QC, Canada
AI/ML Research Engineer *Oct 2022 – Feb 2024*

- Developing, deploying, and testing AI algorithms on real hardware and simulations
- Leveraging the deep research work and findings to develop and program integrated software algorithms to solve real-world problems
- Translating mathematical and algorithmic problem specifications into efficient deployable code.
- Developing and proposing new project ideas.
- Writing scientific papers for publication and patents.
- Engaging with Samsung business units to develop new ideas that can have business impact.

Queen's University, School of Computing Kingston, ON, Canada
Graduate Research Fellow *Jan 2021 – Sep 2022, Full-time*

- Modeling and analyzing Federated Learning at the network edge for resource-limited smart devices.
- Developing energy-efficient protocols for Federated Learning.
- Writing and reviewing research articles.

Qatar's University, Computer Science and Engineering Dep. Doha, Qatar

Research Assistant *May 2020 – Sep 2021, Full-time*

- Designing and implementing smart protocols using AI for Ultra Reliable Low Latency Communication (URLLC) in smart health systems.
- Reviewing and employing state-of-the-art smart algorithms for protocols.
- Writing and reviewing research articles.

Skills & Expertise

Software Development

- **Programming Languages:** Python, MATLAB, C/C++, Java, and Bash scripting
- **Machine Learning and Data Science:** SciPy, Pandas, NumPy, SciKit-Learn, Pandas, XGBoost, Matplotlib and Seaborn.
- **Deep Learning:** PyTorch, Tensorflow/Keras, and OpenCV.
- **MLOps**: LightningAI, Weights & Biases, and Azure ML
- **Docker**

Artificial Intelligence

- Data Science and Machine Learning.
- Deep Learning.
- Computer Vision.
- Natural Language Processing (NLP).
- Large Language Models (LLMs).
- Reinforcement Learning.
- Multi-Agent Systems.

Telecommunications and Computer Networks

- Digital Signal Processing.
- Edge networks.
- Internet of Things (IoT).
- TCP/IP network stack.
- Wireless and Cellular Networks.
- Reading 3GPP standards and implementing functionalities.
- Digital twinds, simulation and experimental analysis for telecommunication systems.
